WE NEED TO COVER A LOT OF SHIFTS!

- ▶ We start out with ~20 shifts each (on-call shifts are of course counted)
- ▶ Students are very welcome to help out with shifts! Just tell me if and when you want to go to CERN!
- ▶ I have made a wiki-page with information on how to register, shift-training and how-to-get-started (p1 account, passwords etc <https://wikihost.uib.no/ift/index.php/AtlasShifts>)
- ▶ We all have a responsibility to cover these shifts - but signing up is up to you.

DATA QUALITY SHIFTS

- ▶ DQ shift coordinator: Michael Hauschild
- ▶ Shift-training: One shadow shift. For new shifters (e.g. master students) it can be good to start with these shifts, where you learn to get an overview of the detector.
- ▶ DQ-shift instructions can be found here:
<http://pcatdwww.cern.ch/twiki/bin/view/Main/DQManualShifter>
 - ▶ These are good and easy-to-follow instructions

SCT SHIFTS

- ▶ SCT shift coordinator: Alessandra Ciochio
- ▶ SCT shifts are DCS (Data Control System) and DAQ (Data Acquisition), Monitoring (and Cooling).
- ▶ For each DCS and DAQ you need 1 shift training course (~ 1 h), and 3 training shifts (~ 4 h). These training shifts you can combine - which means that you can cover the training in 5 days (where you spend 1 hour for courses in the first two days and 4 hours for training shifts for three days.)
- ▶ For the SCT monitoring shift I believe you need one training shift
- ▶ Cooling shifts (Arshak and Thomas did this)

HOW TO GET STARTED:

- ▶ you need
 - ▶ Point1 computer account and e-logbook account
 - ▶ access to ATLAS Control Room (ATL-ACR) - this you request in EDH
 - ▶ for SCT-training you also need access to SR1 (ATL-SR1)
- ▶ You sign up for shifts in OTP (Operation Shift Planner) - but to be allowed to do that you need to have covered your shift training for SCT and for DQ-shifts you should contact M. Hauschild and arrange a shadow shift
- ▶ For the SCT training shifts you sign up in the Work Planner (select SCT Training)

ALL THIS INFORMATION IS/WILL BE AVAILABLE AT THE GROUP WIKI-PAGES. PLEASE ASK ME IF SOMETHING IS UNCLEAR.
